## Overview

The system we proposed will manage to ease the task of admins, teachers, students, and others through a multi-function platform.

Not only limited to the internal management, the school system management also manages the school's interaction with the students and parents. This feature indeed makes the communication between the three parties effective.

Recording and reviewing students' attendance records is just one of the main features of the school management system. In this platform, students can download, upload, complete the assignments, notes, and their projects. It is possible because the system is meant to be accessed by everyone who needs a streamline interaction. The system will provide a platform to check their payment. This system will have a feature that connects parents, students and teachers. School management is important because it also helps the school to manage the prospective students data and reduce the use of paper. The school management system connects school and parents directly. It informs the parents' development and students' learning progress because parents won't have time to gradually check their kids' progress in the school.

So the school management system is important for both teacher ,student and also the parents . It will help to build a modern education structure.

## Goals

- 1. Educational Planning**
- 2. Educational Administration**
- 3. Educational Direction**
- 4. Educational Supervision**
- 5. Educational Evaluation**

## Features Details:

### I. Login Option

Login option for security purposes and we are easily identified which type of users visit our system and which type of work he/she wants.

### II. User Type

- Teachers(Admin→ Principal,Vice-Principal/Monitor-->Class Teacher
- Students(User)
- Parents(Only can view the academic performance of his child)
- Guest (Only can view the about the school)

### III. Profile ( teachers / students )

All information is available in this school.

### IV. Video ( public / private / protected )

Study related videos according to the class or level(Videos will be provided by the highly qualified teacher of the institute)

### V. Gallery(public/private)

Photos of different function that organise in school (annual picnic , annual sports day,science fair)

### VI. Blog ( public / private )

It is open for both teacher and student who want to share their valuable knowledge or opinion .But the student blogs will be approved by the teacher.

### VII. Attendance

Teacher can take students attendance in a digital way no need of hard copy or don't have to count the total attendance of month or year .The application will do the whole thing

## VIII. Result

Student teachers and also parents can see their children's academic results by the application so both teacher and parent can monitor their children's progress.

## IX. Notice Board

Every notice given by the institute or by the teacher will be shown here .
